Re: Naples Truck Stop

Dear Mr. Taylor:

The bioremediation treatment plan for the Naples Truck Stop located at 1625 South 1500 East, State Highway 40, Naples, Utah, near Vernal, Utah, has been reviewed. The bio treatment system consists of three tanks with two associated air vents. The total estimated emission rates from the vents fall within the de minimis range as stated in the Utah Air Conservation Rule R307-6 and does not require an Approval Order from this office.

The estimated quantity of hydrocarbons from this project is approximately 777 lbs/yr with benzene emissions 0.73 lbs/day. The air emissions from this project shall be monitored monthly for the first quarter of operation and quarterly thereafter. All laboratory test results obtained from the monitoring shall be submitted to the Executive Secretary, along with the calculations indicating the amount and rate of the air emissions. Please note that this letter does not in any way release the owner or operator of the site from any liability for compliance with all other applicable federal, state, county, and city regulations.

Should you have any questions, please contact me at (801) 536-4075, or J. Tim Blanchard at (801) 536-4057.

Sincerely,

Lynn R. Menlove, Manager
